

# ADOBE® INCOPY® CS3

## COLLABORATE IN DEMANDING EDITORIAL WORKFLOWS

### Consider Adobe Creative Suite® 3 software

Adobe Creative Suite 3 Design Standard delivers a unified design environment for print-publishing workflows, and Adobe Creative Suite 3 Design Premium is the designer's dream toolkit for print, web, interactive, and mobile publishing.

### Creative Suite 3 Design Standard combines Adobe Bridge CS3, Adobe Version Cue® CS3, Adobe Device Central CS3, Adobe Stock Photos, and Adobe Acrobat® Connect™ with:

Adobe Photoshop® CS3  
 Adobe Illustrator® CS3  
 Adobe InDesign CS3  
 Adobe Acrobat 8 Professional

### Creative Suite 3 Design Premium combines the above and adds:

Adobe Photoshop CS3 Extended (in place of Photoshop CS3)  
 Adobe Flash® CS3 Professional  
 Adobe Dreamweaver® CS3

Adobe InCopy CS3 software is a professional writing and editing program that tightly integrates with Adobe InDesign® CS3 software to enable collaborative editorial workflows. With new e-mail–based assignments for easier collaboration and a variety of text-processing enhancements designed to boost productivity, InCopy CS3 helps writers and editors achieve new levels of efficiency.

### Work smarter in parallel with your team

With InCopy, editorial and design teams can accelerate production by working simultaneously instead of in sequence. While designers work on an InDesign document, writers can edit the same document's text using InCopy—and neither contributor will overwrite the other's work. And now, new e-mail–based assignments let you send stories and graphics as a single assignment package to any member of your workgroup, making it easy to assign tasks and integrate contributions without the need for a shared server.

### Write to fit with 100% accuracy

InCopy offers a variety of document views and copyfitting tools to help you write and edit to precisely fit your layout. Work in Galley View to get accurate feedback on the status of copyfitting, line endings, and hyphenation. Or use Layout View to see your copy in the InDesign layout so you can edit text in relation to design—and be notified of layout changes so you can copyfit accordingly. InCopy also features a vertical depth ruler so you can budget space for stories more accurately, and now supports agate measurement units for newspaper publishing.

### Boost editorial productivity

Meet deadlines more efficiently with feature enhancements that help you focus more on your copy and less on your software. A more powerful Find/Change command lets you save standard searches for reuse, customize search scope, and more. New table and cell styles let you apply instant table formatting and help you maintain typographical consistency. Expanded Quick Apply lets you edit and format without taking your fingers off the keyboard, and LiveEdit productivity enhancements simplify file management.

## System requirements

### Windows®

- Intel® Pentium® 4, Intel Centrino®, or Intel Xeon® processor
- Microsoft® Windows XP with Service Pack 2 or Windows Vista™ Home Premium, Business, Ultimate, or Enterprise
- 256MB of RAM (For Windows Vista: 512MB of RAM; 1GB recommended)
- 316MB of available hard-disk space
- 1,024x768 monitor resolution with 16-bit video card (24-bit screen display recommended)
- DVD-ROM drive
- QuickTime 7 software required for multimedia features
- Internet or phone connection required for product activation

### Macintosh

- PowerPC® G4 or Intel processor
- Mac OS X v.10.4.6
- 256MB of RAM for PowerPC processor; 512MB for Intel processor
- 350MB of available hard-disk space
- 1,024x768 monitor resolution with 16-bit video card (24-bit screen display recommended)
- DVD-ROM drive
- QuickTime 7 software required for multimedia features
- Internet or phone connection required for product activation

## Top reasons to upgrade to Adobe InCopy CS3

### E-mail–based assignments

Use new e-mail–based assignments to send stories and graphics as a single assignment package to any contributor in your small workgroup via e-mail. The e-mail package contains all the information needed to update the layout with the added or edited content, so it's easy to assign tasks and integrate contributions without the need for a shared server.

### More powerful Find/Change functionality

Quickly change text and its formatting in documents of any length with enhanced Find/Change functionality. Save your standard searches for easy reuse; customize search scope to include master pages, footnotes, and locked or hidden layers; easily find smart and straight quotes and apostrophes in text; and use grep (regular expressions) to quickly run complex, pattern-based searches.

### Robust table creation and formatting

Convert imported tab-delimited text or Microsoft Excel spreadsheets into tables, and use table and cell styles to quickly format complex tables.

### Advanced bullets and numbering

Make quick work of lists by using styles to apply bullets or sequence numbers to text.

Import bullets or numbering from Microsoft Word documents, and create figure or hierarchical numbering.

### LiveEdit productivity enhancements

Save time with LiveEdit Assignment workflow enhancements like automated file management. Move a story or graphic from one assignment to another, and InCopy automatically moves the associated file to the new assignment's folder. Plus, move more freely through your assignment workflow with fewer dialog boxes, and take advantage of dimmed text and graphics surrounding your stories for context without distraction.

### Workspace and UI customization

Save any combination of panel arrangements and menu configurations as custom workspaces, and smoothly switch between workspaces depending on your task. Customize menus by color-coding or hiding individual menu items for more direct access to commonly used commands.

### Expanded Quick Apply

No more hunting through menus: Expanded Quick Apply lets you instantly select a style, menu command, or script by simply typing a few letters of its name and then pressing Enter to apply it.

## InCopy CS3 product solutions

	InCopy with LiveEdit workflow	InCopy solution from a third-party developer	InCopy solution from a systems integrator
Cost of entry	Lowest (US\$249)	Moderate	Highest
Workgroup size	2–10 people	7–30 people	25–100+ people
Type of work	Short-format monthly publications, annual reports, brochures, and more	Up to 3 longer-format weekly or monthly publications	High volume of publications produced daily, weekly, or monthly
Technology infrastructure	File system, e-mail, or FTP	File system or basic database	High-end database
Customizable UI	Yes	Varies by developer	Varies by developer
Full customization	Not available	Limited availability	High availability
Support services	Standard	Vary by developer	Extensive
